

## **ADEMDUM 1**

1. The pricing method you are requesting for Jet with additive is Platts Gulf Coast Mean Jet A prior week average. The pricing method for the terminals in your area where we would be pulling product are based off Argus. Are you able to change the pricing method in the RFP?

The price difference between PLATTS and ARGUS Gulf Cost Pipeline prior week average should be insignificant; therefore, the Airport will not disqualify the Proposer for using Argus pricing method. If the Proposer uses ARGUS, the Proposer must mention that on the proposal.

2. Can you please confirm what volume you anticipate would be used for amortizing the cents per gallon for the refuelers?

Based Table 1 – KVCT Fuel Sales. As mentioned at the recommended meeting on May 01, 2023, SkyWest purchases its fuel directly from the fuel provider. SkyWest purchases about 120,000 gallons per year. The totals in Table 1 KVCT fuels include SkyWest volume.
